

The Future Roadmap of Precision Oncology to 2030

CURRENT STATE (2026)

- AI-Assisted Diagnosis
- Static Liquid Biopsy
- ADCs
- HER2-Low Targeting

EMERGING INNOVATIONS

- Multiomics Integration
- Digital Twins
- Adaptive Clinical Trials
- Real-time ctDNA

2030 VISION (FUTURE)

- Fully Personalized Therapy
- Continuous Monitoring
- AI Decision Support
- Precision Survivorship
